Mobility helps hospitals

Mobility helps hospitals

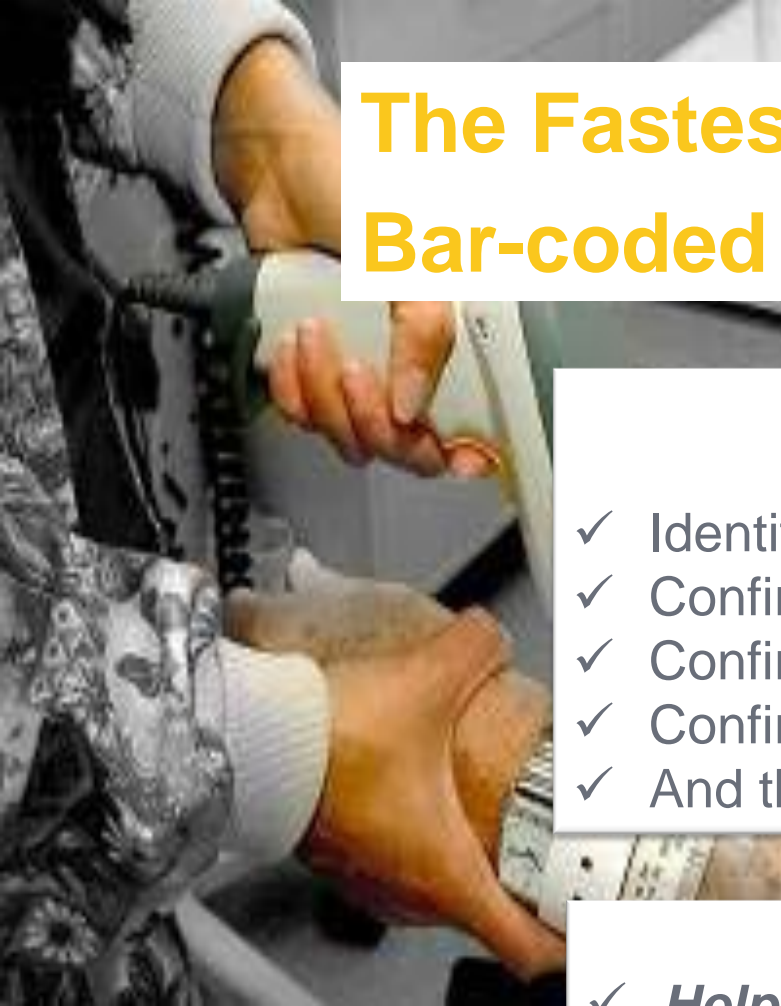

Reduces Costs
Increases Productivity
Minimizes Errors

The Fastest Growing Application

Bar-coded Medication Administration

“The 5 RIGHTS”

- ✓ Identify the RIGHT Patient
- ✓ Confirm the RIGHT Patient Medication
- ✓ Confirm the RIGHT Dosage
- ✓ Confirm the RIGHT Route
- ✓ And the RIGHT Time

Benefits:

- ✓ *Helps meet safety initiatives*
- ✓ *Reduced errors*
- ✓ *Reduced costs associated with errors*
- ✓ *More rapid and accurate documentation*

Dilantin[®]
(Extended Phenytoin
Sodium Capsules, USP)
100 mg

Protect From
Light and Moisture.
DIST BY PARKE-DAVIS
DIV OF PFIZER INC, NY, NY 10017

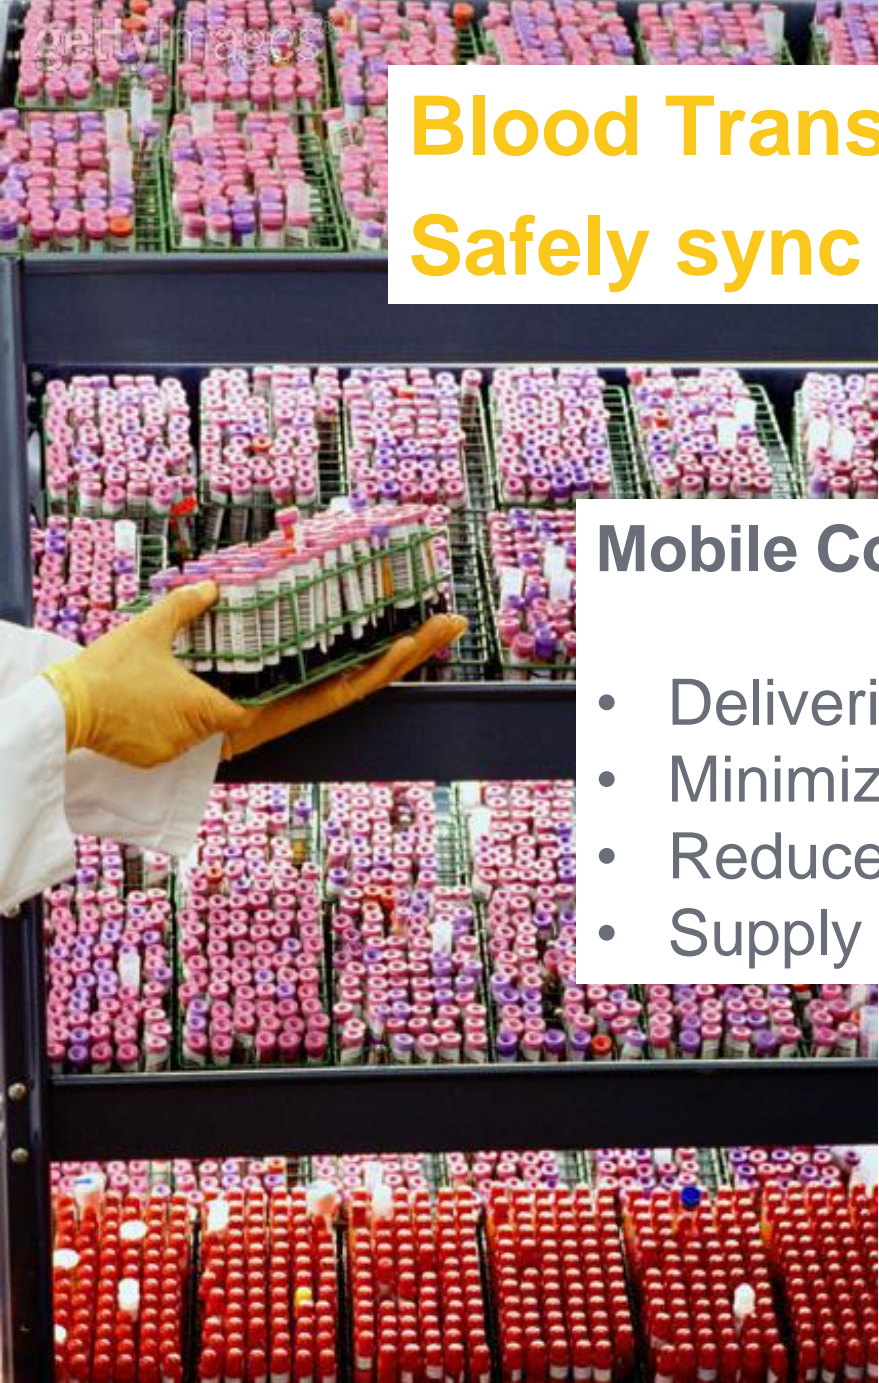

Specimen Collection

Improve accuracy and speed diagnosis

Mobile Computing – Barcode – VoIP – RFID – WLAN

- Minimizes false tests repetition
- Reduces cost of tests repetition
- Increases sampling precision, labeling and analyzing specimens
- Reduces the chance of the wrong specimen from the wrong patients in the wrong way at the wrong time.

Blood Transfusion Verification

Safely sync blood supply and demand

Mobile Computing – Barcode – VoIP - RFID – WLAN

- Delivering the right blood type to the right patient
- Minimizes errors
- Reduces costs
- Supply chain accuracy

Medication Administration

Reduce mistakes and increase safety

Mobile Computing – Barcode – VoIP - RFID – WLAN

- Reduces errors in medication administration
- Improves the quality of patient care
- Confirms the prescription time, dosage at the patient's bedside
- Increases patient safety

Asset Management and Tracking

Manage assets to minimize costs

Mobile Computing – Barcode – RFID – WLAN

- Fast tracking of Medical devices
 - Find location of that equipment
 - Inventory control / Stock reduction
 - Device maintenance process
- (heart monitors, IV machines, wheelchairs, etc.)

Remote Patient Monitoring

Monitor patients, not paperwork

Mobile Computing – Barcode – VoIP - RFID – WLAN

- Mobile flexibility increases productivity
- Remotely monitor devices (pumps, monitors, etc.)
- Monitoring instant alerts of a patient's condition
- Improve speed and quality of medical treatment even when there is a personnel understaffing
- Reduction of Paperwork

Hospital/Nurse Communication

Maximize nurse and physician productivity with WLAN and VoIP

Mobile Computing – Barcode – VoIP - RFID – WLAN

- Improves the ongoing and critical dialogue between medical staff
- Easy access to medical records or patients data
- Reduces wasting time
- Spending more time with their patients

Wireless Broadband for Healthcare

High-speed, reliable and secure connectivity for healthcare delivery systems

Mobile Computing – Barcode – VoIP - RFID – WLAN

- Eliminate geographic barriers
- Maximizes investments in Healthcare IT
- Digital health communities, medical images, clinical data and operational information can be cost effectively accessed

Workflow Optimization

Mobile Physician Rounding

High-touch care with high-tech solutions

Mobile Computing – Barcode – VoIP - RFID – WLAN

- Paper-based medical charts can be time-consuming to find, review and record.
- Capture vitals, view lab reports and place orders.
- Physicians spend less time filling out charts
- Spend more time working directly with patients, diagnosing and treating symptoms.
- Focus on high-risk patients and move low-risk cases out of beds more quickly.
